- 20 External lighting
- 21 Imported material
- 22 Unexpected contamination
- 23 Water efficiency
- 24 Archaeological written scheme of investigation
- 25 Minerals and waste – Materials Management Plan (PC)
- 26 Fire hydrant provision

PC = Pre-Commencement

Other applications

4. **Appl. No** : **2022/2419**
Parish : **WRAMPLINGHAM**
 Applicant's Name : Sam Thain
 Site Address : Field to the south of Watton Road, Wramplingham, Norfolk
 Proposal : Change of use from agricultural land to dog exercise field
- Decision : Members voted unanimously for refusal for the following reason:

The change of use of the land from agricultural to a dog walking field would result in a significant increase in noise and nuisance arising from the activities of the site. The resulting noise exposure and nuisance from the site would represent an unacceptable excessive adverse impact on residential amenity to existing and future properties in the area. The application is therefore contrary to Policy DM 3.13 (criterion 1) of the South Norfolk Local Plan which seeks to avoid incompatible uses in terms of noise and other nuisances, and (criterion 2) which takes account of the character and function of the area and the need to protect areas of rural tranquillity. The application also fails to accord with Policy DM 2.8 of the South Norfolk Local Plan.

5. **Appl. No** : **2023/3108**
Parish : **ALDEBY**
Applicant's Name : Mr W Purdom
Site Address : Land south of Rectory Road, Aldeby
Proposal : Erection of 6 poly tunnels, 2 sheds and new access
- Decision : Members voted, with eight in favour and 1 abstention, for refusal for the following reason:

The existing site is an open agricultural field within the C2 Thurlton Tributary Farmland and Parkland character area Landscape Area. It is considered by virtue of the provision of 6 polytunnels and 2 sheds and associated works including formalised hardstanding, that the proposal would result in a harm to the visual open character of the area. Furthermore, by virtue of the size and amount of proposed buildings on the site, it would give rise to a consolidated form of development in this open countryside location. The development therefore not respond to its setting and would not conserve and enhance the character and quality of the built environment and local landscape, not would it enhance local distinctiveness or sense of place. It is also considered that the proposal would have a significant adverse impact on the character and appearance of the surrounding area. Therefore the application is contrary to Policies DM1.3, DM1.4, DM2.7 (c) and (d), DM4.5 of the SNLP and Policies 2 and 3 of the GNLP.

The officer recommended refusal reason 2 (Insufficient information has not been provided to demonstrate that the proposal can provide suitable on-site parking facilities and therefore the proposal is considered to cause a detriment to highway safety contrary to Policies DM3.11 and DM3.12 of the SNLP) was no longer necessary.
